

February 1, 2012

ACHC is pleased to announce the release of our updated accreditation standards

The annual update to the ACHC Standards for Accreditation is now available. ACHC aims to provide organizations with the most up to date and comprehensive set of standards. Each year ACHC compiles feedback from accredited organizations, surveyors and industry consultants in regard to the ACHC Standards for Accreditation. With this information ACHC has modified some wording, consolidated standards and clarified interpretations. The main intent of most standards has not changed.

Please make sure to review all the standards to see where any intent changes will affect your organization. Any changes to the standards will be underlined and italicized. Compliance with the updated ACHC Standards for Accreditation will be June 1, 2012. You may now access the updated Standards for Accreditation by logging into your Customer Central web site at <http://cc.achc.org>. If you have any questions, you may contact your Account Manager at (919)785-1214 or by email.
