KanTime Receives ACHC Product Certification

CARY, N.C. – Accreditation Commission for Health Care (ACHC), a leading national healthcare accreditor, announces it has awarded product certification to KanTime Healthcare Software, a top post-acute electronic medical record (EMR) software provider.

“EMR technology is improving patient care and enhancing operational efficiency across the healthcare landscape,” said Susan Mills, ACHC Senior Program Director. “Achieving certification demonstrates KanTime’s dedication to providing high-quality solutions that benefit providers and the patients they serve.”

“We are proud to be recognized with ACHC Product Certification and we will continue to enhance our partnership with ACHC,” added Deanna Heath, Vice President of Hospice and Palliative Care at KanTime. “Such an acknowledgment serves as proof of the dedication and specialized expertise we invest in our software products. Our customers can trust that our offerings comply with the most stringent quality and regulatory requirements, enhancing the care they provide and the experiences of their patients.”

Certification confirms KanTime products meet ACHC Standards in seven areas: administration, operations, fiscal management, human resources, provision of care and record management, quality, and risk management.

KanTime EMR software solutions are available for four ACHC Accreditation programs: Home Care, Home Health, Hospice, and Palliative Care.

About KanTime Healthcare Software

KanTime Healthcare Software is the fastest growing post-acute software provider in the nation. We provide cloud-based enterprise software to home health, hospice, pediatric, private duty, and consumer-directed services agencies. KanTime helps agencies improve clinical compliance, increase operations efficiency, and achieve financial success. KanTime works seamlessly on any point of care device. Additionally, KanTime offers business intelligence tools that enable management to drill down into clinical, financial, and operational KPIs and take action.
